

Holopsony

Holopson is a therapeutic system that allows for the hearing of music to be modified, so the functioning cells of physical body can change thru better communication with brain. Holopson computer program allows for the filtering three octaves of sound, also peaks and valleys of sounds, which enables correction of persons corresponding auditory sensitivity and other related issues. Holopsony music is created by mirroring the image of sounds where individuals hearing is out of balance. On the back of this page is a test showing individuals hearing out of balance. The peaks, valleys and octaves can then be modified specifically for individuals healing. Modified music or Holopsony has an effect on behavior and function on a cellular level. It is not necessary to make a diagnosis of the causes of the problems in order to treat individual. How the body response to modified sound will be different depending on individual issues of person and the correlations within ones biological systems. The disappearance of peaks and valleys corresponds to liberation and an improvement of the physical, chemical and emotional troubles in question as if one were untangling the knots tangled in the course of life. The course of Holopson consists of having the individual listen for 20 sessions. Once a week a schedule time of ½ hr to 1 hr., and a hearing test (every 20th session), to help assist direction of healing process.

In course of treatment individual can experience crises of the aggravation of their symptoms: nervousness, depressions, anxiety, or sadness until their unconsciousness of old events are identified by mirroring thru modified music, Holopsony. Improvement depends on individual's ability to let go, experience the stress and move on to relaxation or healing by means of biological communication. No two persons can have the same cancer or lumbar pain etc.; we all have different life experiences. We all are individuals with different issues which make up our disease or health problems. Holopsony is a tool which can unlock issues thru mirroring music to identify ones issues, with modified sounds of balanced harmonic music. Holopsony can help liberate hidden issues that can not be diagnosed or analyzed by means of intellectual experiments of man. The tool to see our hidden issues now can be done thru mirroring music or Holopsony. All individual progress and development is different. Not all heal at once. Stages become clear, some problems are resolved, others resurface, the path of some are long for others the change is quick. As a whole intellectual capacity, rational thinking, the imagination, brain integrates new inputs, and the creative explosions of new ideas will surface. The mind and body starts to communicate as the body heals as a whole. Holopsony increases our consciousness so we can see ourselves and understand the things in life, events, and people much better.
