

Agua Miracle Water Ionizer

Agua Miracle Water Ionizer

Among all the health discoveries, getting the body alkaline was discovered to be one of the most powerful things for staying healthy. Purified Alkaline Water is a powerful anti-oxidant, and with its super-hydrating properties, helps us get and stay healthy. Drinking alkaline water changes your life!

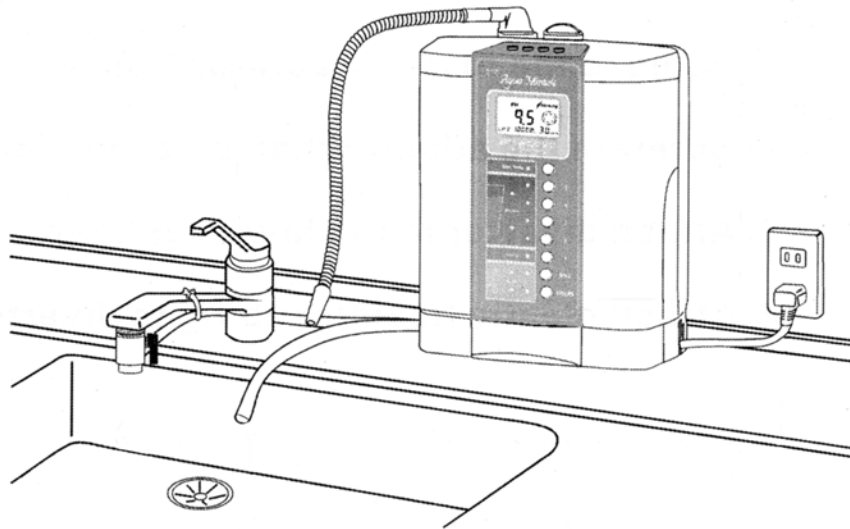

The Agua Miracle Water Ionizer is a simple way to turn your acid chlorinated tap water into healthier alkaline water that can work wonders for your body.

- * Removes Chlorine
- * Neutralizes Free radicals
- * Helps promote healthy weight loss
- * Increases your body's immunity
- * Increases absorption of nutrients
- * And much, much more.

Your body is 70% water, and when the water you drink is contaminated and acidic, that's what your body becomes! After drinking and cooking with healthy alkaline water, you'll never want to use any other kind of water again!

As an added feature, this machine can also make strong acidic water to be used for a safe non-toxic decontamination of cutting boards and food preparation areas. This technology is used in hospitals in Japan to eliminate bacteria growth. The Agua Miracle gives you alkaline water at less than half the price of other water ionizers while delivering the same quality of water of the higher priced machines!

How the Agua Miracle technology works.

What is Ionized Water and Why We Should Consume It

Alkaline Ionized Water is by far the most superior drinking water available. Ionized Water is electronically enhanced water created through electrolysis. It is produced by running normal tap water over negative (cathode) and positive (anode) electrodes, which ionizes the minerals in the water creating positive (hydrogen) and negative (hydroxyl) ions. The electrodes are composed of titanium, the hardest metal known, and coated with platinum, which is an excellent and durable conductor.

The magic comes when the membranes separate the hydrogen and hydroxyl ions, thus creating alkaline and acidic water. These two waters are always produced simultaneously during the ionization process, 70% Alkaline Ionized Water and 30% Acid Ionized Water. Therefore, producing one gallon of Ionized Water yields approximately 0.7 gallons of Alkaline Water and 0.3 gallons of Acid Water.

Electrolysis is most often conducted by placing the anode and cathode in the same solution without a membrane barrier between them. The negative and positive ions cancel one another out, usually causing strong discoloration of the water. The semi-permeable membrane that separates positive and negative ions into alkaline and acid water is one of the great health breakthroughs of the 20th Century.

The properties of Alkaline Ionized Water are that it is an antioxidant, and it is alkalizing, hydrating and detoxifying. If we expect to be healthy we must Hydrate, Alkalize and Detoxify the body.

These products are neither formulated nor prescribed for any medical condition. They are intended for use as an important addition to the daily diet.

Features

- Built-in mineral port to add calcium and other water soluble minerals
- Constant ORP monitor and readout
- Adjustable pH monitor
- pH selection of 5 levels
- Fully adjustable power to electrodes. 190 power settings.
- Can be used with any water source containing minerals
- CE certification
- Automatic cleaning alert
- Built-in one micron sediment fiber carbon filter which removes chlorine, particulate and other harmful elements from tap water. Ultra filter and Biostone Filter also available.
- Automatic indicator alert when filter requires replacement
- Easy installation of unit next to or over sink
- Wall-mounted option
- Comes with everything needed to install unit.
- Fully automated diagnostic system
- Color LCD Screen
- 5 Year Warranty
- SMPS power supply

Product Specifications

Product Name:	Agua Miracle Water Ionizer
Product Code:	113
Product Dimensions:	Packaged: 12.5" x 10" x 5.5"
Weight:	Packaged: 11 lbs
Electricity:	DC - 2A~6A
Voltage:	AC 110V (220V available by request)
Electrodes:	Platinum/Titanium
Electrode size:	1350 cm ² (7 plate)
Power Consumption:	80 to 120 Watts, depending on model
ORP Range (Alkaline Water):	+800mV to -100mV (Depending on source water.)
ORP Range (Acid Water):	600+ mV to 900+ mV (Depending on source water.)
pH Range:	2.5 - 11.0+ (Depending on source water.)
Filter Capacity:	Approximately 10,000 Liters (10,600 quarts or 2,650 gallons)
Chlorine Removal:	< 0.0001 ppm (99.9999%)
Water Temperature:	39 degrees to 98 degrees Fahrenheit (4 degrees to 39 degrees Celsius)
Fuse Protected:	4 Amp
Cord Length:	5 feet - 3 prong plug
Warranty:	5 year
